

Type 0344 can be combined with...

Type 2508

Cable plug

The pilot-controlled 3/2-way valve Type 0344 with a smoothly operating servo-piston requires a differential pressure of 0.25 bar for complete opening and closing. A 3/2-way pilot valve (pivoted armature valve) ensures safe and reliable operation. It is available in circuit function C and D. An additional return spring ensures reliable switching behavior at low pressures and vacuum.

Circuit function C

3/2-way valve, when de-energized outlet port A exhausted, with 3-way pilot control

Circuit function D

3/2-way valve, when de-energized outlet port B pressurized, with 3-way pilot control

Circuit function C (Impulse)

3/2-way valve, when de-energized outlet port A exhausted, with 3-way pilot control

Circuit function D (Impulse)

3/2-way valve, when de-energized outlet port B pressurized, with 3-way pilot control

3/2-way Solenoid Valve for compressed air and vacuum applications

- Service friendly manual override
- Vacuum specific version
- Optimized piston design for low switching pressure
- Energy saving impulse coil

Technical data

Orifice	DN 8.0 - 40 mm
Body material	Brass
Coil material	Epoxy
Coil insulation class	H
Seal material	NBR
Medium	Neutral gases, compressed air, vacuum
Medium temperature	0 to +90 °C
Ambient temperature	Max. +55 °C
Voltage tolerance	±10 %
Duty cycle	Continuous operation 100% ED
Electrical connection	Cable plug for Ø 7 mm cable, acc. to DIN EN 175301-803 Form A (supplied as standard)
Protection class	IP 65 with cable plug
Installation	As required, preferably with actuator upright

Flow rate Q _{Nn} value air [l/min]	Measured at +20°C, 1 bar pressure at valve inlet and free outlet
Pressure values [bar]	Overpressure with respect to atmospheric pressure
Response times [ms]: Opening Closing	Measured with water at valve outlet at 6 bar and +20°C Pressure rise 0 to 90%, Pressure drop 100 to 10%

* Cable plug Type 2508 (supplied as standard) acc. to DIN EN 175 301-803, Form A
